Ascend Technologies

Healthcare Services

Navigate regulatory guidelines and consumer demands

The Ascend healthcare team compromises uniquely qualified senior professionals and consultants with deep insight into the healthcare landscape, clinical models, and supporting technologies. For over a decade, we have worked with leading healthcare organizations across the region. We aim to help physicians and their organizations deliver patient-centered, high-value care that reduces costs, increases quality, and improves workflow efficiency.

Services You Gain

Multi-Year Quality Strategy Planning

Craft a comprehensive quality strategy aligned with your goals for continuous improvement and superior patient outcomes.

HIPAA Compliance Support

Navigate the complex regulatory landscape with confidence. Our consultants provide HIPAA compliance assessments, policy development, training, and ongoing support to safeguard protected health information.

Application Administration

Maximize application value through effective administration and support, including user management, configuration, and troubleshooting.

Chart Reviews

Documentation guidelines have changed over the last several years and our certified, expert consultants will give you valuable insight into your providers compliance and chart accuracy by performing in-depth chart reviews.

Practice Workflow Analysis

Optimize your practice operations with tailored workflow solutions, enhancing efficiency, and performance.

The Ascend Advantage

Experts You Can Trust

EMR & PM Vendor Managemnt

Leverage our expertise in EMR and PM systems for seamless implementation, integration, and ongoing support. Optimize system performance and user satisfaction through vendor management services.

Security Risk Assessment

Strengthen your cybersecurity infrastructure. Identify vulnerabilities, develop mitigation strategies, and enhance your security posture with our thorough SRA.

Information Blocking Assessment

Ensure compliance with information blocking regulations by assessing and optimizing your data sharing practices.
