

Application

Development

Custom application solutions from development to deployment.

Gain comprehensive support across all phases of application lifecycle management, from maintaining custom applications to launching software testing projects or agile transformations.

Ascend Technologies offers both project-based and managed services models, ensuring flexibility and scalability for your evolving needs. With expertise in Microsoft technologies and agile processes, we ensure your custom applications are optimized, enhanced, and continuously supported for peak performance.

Services You Gain

Cloud Operations

Ensure the scalability, performance, and continuous uptime of your cloud assets with expert optimization and management of your cloud-based infrastructure and custom applications.

Application Development

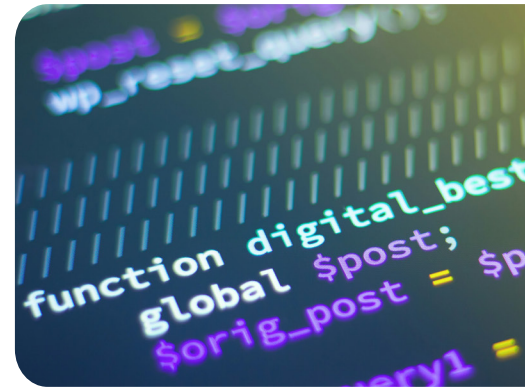

Benefit from extensive expertise in developing, customizing, and enhancing specially made applications tailored to your business needs, with a focus on leveraging Microsoft technologies.

Process Improvement

Through workflow analysis and agile methodologies, we help streamline your operational processes, driving efficiency and delivering measurable improvements.

DevOps Services

From 'Infrastructure as Code' to 'Deployment Pipelines', our experts ensure your application code moves seamlessly from developers to customers effectively and efficiently.

Advantages

Industry Expertise

Experience in application development and best practices equips us to help industries solve their most complex problems with their tailor-made software.

Technical Depth

With decades of combined experience, our App Solutions Team has technical expertise in .NET, Azure, SQL, AngularJS, JavaScript, and other leading technologies.

Business-First Mindset

We seek to understand your business needs and deliver simple, scalable solutions while maintaining an architecture for innovation.

Fast and Flexible

Our team leverages agile practices to quickly evaluate, develop, and iterate on a wide variety of problems to provide effective solutions.
